Dewalt T-STAK Toolbox Mounts

3 Pack

StealthMounts

StealthMounts Wall Mounts for Dewalt T-STAK are designed to individually wall mount T-STAK storage boxes saving floor and worktop space. The wall mounts consist of two separate parts which are to be gently broken apart, the main mount and the spacer, both have countersunk holes to allow firm mounting the wall. The hinge of the storage box hooks over the edge of the main mount and is held firm by gravity and rated to 20kg. The base of the box sits in the ledge of the spacer to keep the level against the wall. Made in Great Britain our Dewalt T-STAK Mounts are made using extremely durable injection moulded ABS plastic.

- Keep your T-STAK boxes off the floor by mounting them to the walls of your workshop
- Easy access to all of your tools
- Keep your workshop organised
- Made using strong injection moulded ABS plastic
- Easily installed
- Made in Great Britain
